TwinScreen Flex

Product Information

Give a new dimension to your projection space.

Made of a matt or transparent material film with enhanced reflective properties, twinscreen® screens meet all the requirements for digital signage, (viewing at 360°, doublesided projection–front-rear, image quality day/night...). twinscreen® screens by PROCOLOR are used on glass surfaces both indoor and outoor.
Easy installation
The Flex films can be easily placed on any smooth glass or acrylic surface; they can be positioned nearly anywhere: shop fronts, shop windows, etc. Besides they are very inconspicuous when no image is being projected.

Flexibility
Flex screens fulfill all your requirements and offer you excellent image quality. They can also be adapted to your specific demands: cut into any custom-made shape, unlimited size of the image.

TECHNICAL CHARACTERISTICS

Twin Flex
- Application: Shop window or any glass/plexi/polycarbonate surface inside or outside.
- Twin Flex may be repositioned as frequently as required.
- Viewing sides: 2
- Can be used for either front or rear projection.
- Twin Flex is white - projected image will be visible on both sides.
- Roll width: 135 cm
- Also available at Film, positionable one single time.

Flex High Contrast
- Application: Shop window or any glass/plexi/polycarbonate surface with direct sunlight.
- Flex High Contrast may be repositioned as frequently as required.
- Viewing sides: 1
- Designed as a rear projection surface.
- Flex High Contrast allows a wide viewing half angle even in high sunlight applications.
- Roll width: 120 cm
- Also available as Film, positionable one single time.

Flex Contrast Luminosity
- Application: Ideal for museums and applications with minimum ambient light concerns.
- Flex Contrast Luminosity may be repositioned as frequently as required.
- Viewing sides: 1
- Designed as a rear projection surface.
- Roll width: 120 cm
- Also available as Film, positionable one single time.

Flex Projection
- Application: Shop window or any glass/plexi/polycarbonate surface.
- Flex Projection may be repositioned as frequently as required.
- Viewing sides: 1
- Designed as a front projection surface.
- Used for front projection with opaque back. No directionality, viewing half angle is 90°.
- Roll width: 120 cm
- Also available as Film, positionable one single time.
